*CustomGuide has proven to be a great investment as they ensure that each instructor is prepared for class with a curriculum that is of high quality, student friendly, and adaptable to the audience. Using CustomGuide has also allowed us to keep our classes cost-effective, as students do not have to purchase an expensive text book that typically ends up sitting on their bookshelf after the class.*

*When we offered the Online Learning we received an overwhelming interest, even more than I thought we would. Everyone was very appreciative that we were offering it, and expressed their gratitude in e-mails to us. They like it because they can use it in their work area when things are slow, or even at home.*

*My students LOVE the manual I made with your courseware! I am immensely pleased with the product and have saved really hundreds of hours of design time by just picking and choosing what I want from the courseware. I'm learning so much myself in putting this all together that I'm much more productive in my use of Windows and Microsoft software. I can't wait to create each manual because I myself learn so much.*

Stephanie Zimmerman

*CustomGuide, in my opinion, seems to present the material in the best way to make it easy to learn.*

Phil Buckberg

*I want everyone to know how extremely helpful you are when I have questions. In this stressful and hectic environment of deadlines, it is comforting to know you are only a phone call or email away with the exact help I need. Just to know I can actually talk to a real person who gives me the support I need in a crunch means more than words can say.*

Pam Eisenhour

*I did a demonstration today of our new Online Learning and the response was wonderful. Everyone in the group wanted an account; it's a hit! I was proud to offer CustomGuide's material. Everyone was impressed with the features and the ease of use. What a terrific product you have!*

Wendy Schultz

*I love your online courses! The segments are very small, only a few minutes each, so if you have limited time available, you can do a few and move on. I also like that you can choose a topic from the itemized list. I've had instances that I've been questioning how to do something so I go to my online training, choose the desired topic and learn about it in just a few minutes without having to bother anyone to take the time to come help me.*

Leah Svendsen

*CustomGuide has been a terrific help to get me up to speed with programs I need to work with, but don't have time to learn. The ability to go online for a couple minutes at a time, 24/7 lets me learn whenever I have free time. I showed your program to our CFO and he asked if it could show him how to work with pivot tables in Excel; five minutes later, he was a believer. Virtually everyone I show it to has either signed up, or plans to. Good job!*

*CustomGuide is very reasonably priced and easy to use. We rolled it out during our WordPerfect to Word conversion and our staff raved about it. I've also included a link to a recent article about the founders of the company. I don't know about you, but I like to cater to these types of companies. CustomGuide is genuine and real – and they offer fantastic, friendly customer service.*
