Beginning of a Line	<Home>
End of a Line	<End>

Helpful Tips

- **Not sure what a toolbar button does?** Place the mouse pointer over the button for a few seconds; a box with the button's description will usually pop up.
- **Need help?** Press the <F1>. A help window will appear with information about the program.
- **Want to do something to an object?** Try clicking the object with the right mouse button. A list of what you can do to the object will appear in a shortcut menu.
- **Make a mistake?** Try using the undo command by selecting **Edit** → **Undo** from the menu, or by pressing <Ctrl> + <Z>.
- **Need to use the menu without using the mouse?** Press <Alt> and the underlined letters of the menu item you want to open.
- In a dialog box you can press <Enter> instead of clicking OK, and press <Esc> instead of clicking cancel.
- **Not sure what a control in a dialog box does?** Click the **?** **What is this button** in the upper right corner of the window and then click the control with the mouse pointer.
- **Not sure what programs are running?** Look at the names on the taskbar along the screen's bottom.

Customizing Windows

The Windows Toolbar

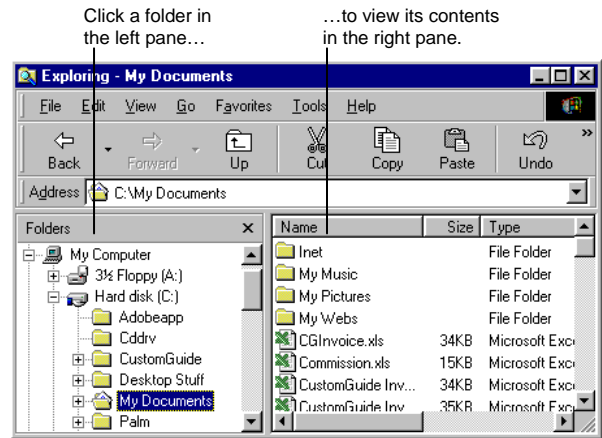

- **To Add an Item to the Start Menu:** Right-click the taskbar and select **Properties** from the shortcut menu. Click the **Start Menu Programs tab** and click **Add**. Click the **Browse** button, open the program's folder, and double-click the program name. Click **Next** button, open the program's folder, and double-click the program name.
- **To Remove a Program from the Start Menu:** Right-click the taskbar and select **Properties** from the shortcut menu. Click the **Start Menu Programs tab** and click **Remove**. Open the program's folder, select the program, and click **Remove**.
- **To Organize the Start Menu:** Right-click the taskbar, select **Properties** from the shortcut menu, click the **Start Menu Programs tab**, and click **Advanced**. Using basic file management techniques, add new folders to the Programs Menu as needed, and move folders and files around using drag and drop.
- **To Create a Shortcut to a File or Folder:** Drag the file or folder to a new location with the **right mouse button** and select **Create Shortcut Here** from the shortcut menu.
- **To Change Display Settings:** Right-click a blank area on the desktop and select **Properties** from the shortcut menu. You can change the following settings in the Display dialog box:
 - + Wallpaper
 - + Desktop icons
 - + Screen saver
 - + Screen resolution & color depth
 - + Basic windows colors
 - + Display driver

Maintenance and Fixing Problems

- **To Format a Floppy Disk:** From My Computer or Windows Explorer, right-click the floppy drive and select **Format**. Select the formatting options you want to use and click **Start**.
- **To Copy a Floppy Disk:** Insert the disk you want to copy, open My Computer or Windows Explorer, right-click the floppy drive, select **Copy Disk**, and click **Start**.
- **To Use ScanDisk:** Open My Computer or Windows Explorer, right-click the disk you want to scan, select **Properties** from the shortcut menu, and click the **Tools tab**. Click the **Check Now** button, specify whether you want to do a Standard or Thorough scan and if you want any errors to be automatically fixed, and click **Start**.
- **To Defragment your Hard Disk:** Open My Computer or Windows Explorer, right-click the disk you want to defragment, select **Properties** from the shortcut menu, and click the **Tools tab**. Click the **Defragment Now** button and click **Start**.
- **To Use Disk Cleanup to Free Space on Your Hard Drive:** Open My Computer or Windows Explorer, right-click the hard disk and select **Properties** from the shortcut menu, click the **Disk Cleanup button**, and click **OK**.
- **To Remove a Program:** Click the **Start button** and select **Settings** → **Control Panel**, double-click the **Add/Remove Programs** icon, find and select the program you want to remove from your computer, and click the **Add/Remove... button**.

File Management

Windows Explorer

- ☑ This folder contains hidden sub folders. Click to display those hidden folders.
- ☑ This folder's subfolders are displayed. Click to hide subfolders.

- **To Open a File or Folder:** Double-click the file or folder.
- **To Create a Folder:** Right-click any empty area in the window and select **New** → **Folder** from the shortcut menu, or select **File** → **New** → **Folder** from the menu.
- **To Rename a File or Folder:** Right-click the file or folder, select **Rename** from the shortcut menu, type a name for the folder, and press **<Enter>**.
- **To Delete a File or Folder:** Select the file or folder and press the **<Delete>** key.
- **To Restore a Deleted File:** Double-click the Recycle Bin to open it. Find and right-click the deleted file and select **Restore**.
- **To Empty the Recycle Bin:** Right-click the Recycle Bin and select **Empty Recycle Bin** from the shortcut menu.
- **Move/Copy a File or Folder (Drag and Drop Method):** Move a file or folder by clicking it and dragging it to the desired location. Hold down the **<Ctrl>** key while you drag to copy the file or folder.
- **Move/Copy a File or Folder (Toolbar Method):** Select the file or folder, click the **Move to button** or **Copy to button** on the toolbar, and select a destination for the file or folder from the dialog box.
- **To Copy a File or Folder to a Floppy Disk:** Right-click the file or folder and select **Send To** → **3½ Floppy (A:)** from the shortcut menu.
- **To Change How Items are Displayed:** Select **View** from the menu and select one of the four view modes, or select a view from the **View button list arrow** on the toolbar.
- **To Select Multiple Files:** Hold down the **<Ctrl>** key while you click the files you want to select.
- **To Find a File:** Click the **Start button** and select **Find** → **Files or Folders** from the Start menu. Enter the search conditions and where to look on the appropriate tabs: Name & Location, Date, and Advanced. Click **Find Now** to start searching for the file(s).
- **To Open Windows Explorer:** From any folder, click the **Folders button** on the toolbar.
- **To View a File or Folder's Properties:** Right-click the file or folder and select **Properties** from the shortcut menu.
