Switch desktops .....	+ <b>Ctrl + ← / →</b>
Close active desktop .....	+ <b>Ctrl + F4</b>
Peek at desktop .....	+ <b>,</b>
Minimize all but the active window .....	+ <b>Home</b>
Refresh active window .....	<b>F5</b>

### Start Menu

**Open the Start Menu:** Click the **Start** button on the taskbar, or, press the key.

**Resize an App Tile in the Start Menu:** Right-click a tile, select **Resize**, and select a size.

**Rearrange Tiles:** Click and drag a tile to a new location in a group. Or, drag a tile between groups to start a new group.

**Remove a Tile from the Start Menu:** Right-click a tile and select **Unpin from Start**.

**Add a Tile to the Start Menu:** Right-click an app and select **Pin to Start**.

**Turn off an App's Live Tile:** Right-click a tile, select **More**, and select **Turn Live Tile off**.

**Rename Tile Groups:** Click a tile group's name, type a new name, and click outside the name field to save the changes.

**Lock Your Computer:** Click the **Account** button and select **Lock**.

**Sign Out of Windows:** Click the **Account** button and select **Sign Out**.

**Shut Down or Restart Your PC:** Click the **Power** button and select either **Shut down** or **Restart**.

### Apps & Taskbar

**Launch an App:** Click the app's tile in the Start menu. Or, scroll through the list of apps at the left of the Start menu and select the app you want to open.

**Install an App:** Click the **Microsoft Store** icon on the taskbar. Browse or search for the app you want and click it. Click **Get** to install a free app or **Buy** to install a paid app.

**Update an App:** Click the **Microsoft Store** icon on the taskbar and click the **See more ...** button at the top-right of the window. Select **Downloads and updates** and click the **Get updates** button at the top of the window.

**Uninstall an App:** Click the **Start** button and click the **Settings** button at the left of the Start menu. Click the **Apps** category and select **Apps & features** at the left. Select the app you want to remove and click the **Uninstall** button.

**Hide the Taskbar:** Right-click an empty space on the taskbar, choose **Taskbar settings**, then toggle **Automatically hide the taskbar in desktop mode**.

**Windows 10 Tablet Mode:** Swipe in from the right side of the screen and click the **Tablet Mode** button.

## New Features

[The Action Center](#): Gathers recent notifications. Click the **Action Center** icon button on the taskbar or slide your finger in from the right side of the screen on a touchscreen device to view it. It also includes some helpful quick commands:

[Edge](#): Microsoft's faster, more secure web browser. While Internet Explorer is still available in Windows 10, Edge is the preferred browser. Click the **Edge** icon on the taskbar to start browsing.

[Task View](#): Allows you to add and switch between multiple desktops. Click the **Task View** button on the taskbar, then click the **New Desktop** button for each additional desktop you'd like to add. Click a desktop's thumbnail in Task view to switch to it.

[Tablet Mode](#): A mode in Windows, optimized for touch, that automatically engages when a touchscreen device or hybrid computer is in use. Manually turn Tablet mode on or off in the Action Center.

[The Settings App](#): An application that includes a number of options to control how your Windows 10 operating system behaves. Click the **Start** button, then click the **Settings** icon to open and modify the system settings.

[Quick Access](#): A customizable view in File Explorer that includes a few pinned folders, as well as some other folders and files that you've used the most. Click the **File Explorer** icon on the taskbar to see the Quick Access screen.

[Windows Ink](#): Used for touch screen devices with a stylus, Windows Ink allows you to write on your screen or create sticky notes and drawings. Click the **Windows Ink Workspace** icon on the taskbar to enable drawing with a stylus.

[Windows Hello](#): A secure sign in feature that allows you to sign into Windows 10 using facial recognition or a fingerprint. Click the **Start** button and click the **Settings** icon. Then click **Accounts** and select **Sign-in options** at the left. Under Windows Hello, select **Set up**. **Note:** Windows Hello is not available for use on every device.

## Folders and Files

[Open File Explorer](#): Click the **File Explorer** icon on the taskbar. Double-click a file or folder to open it.

[The File Explorer Ribbon](#): Contains options you'll need to work with your files. Click a ribbon tab (i.e. Home, Share, View) to see related commands.

[Move or Copy Files and Folders](#): Select the file or folder you want to move, then click the **Home** tab on the ribbon. Click the **Move To** or the **Copy To** button and select the destination folder.

[Rename Files and Folders](#): Select the file or folder you want to rename in File Explorer and click the **Home** tab on the ribbon. Click **Rename** in the Organize group. Type a new name for the file or folder, then press **Enter**.

[Delete Files or Folders](#): Select a file or folder to delete in File Explorer. Click the **Home** tab on the ribbon and click the **Delete** button list arrow. Select **Recycle** to move it to the recycle bin or **Permanently Delete** to completely remove the file or folder from your computer.

[Search File Explorer](#): Click in the **Search** field in the upper-right corner of the File Explorer window. Type your search term(s). Use the options in the Location group of the Search tab to change the search location.

[File Explorer Views](#): Click the **View** tab in the File Explorer window. Use the options here to change how your files are viewed and organized.

[Compress Files or Folders](#): Select the files or folders you want to compress and click the **Share** tab on the ribbon. Click the **Zip** button and type a name for the compressed folder, then press **Enter**.

[Create a Desktop Shortcut](#): Right-click a file, folder, or program, then select **Send To**. Select **Desktop (Create Shortcut)** in the menu.

[Sort Desktop Icons](#): Right-click the desktop and select **Sort by** in the menu. Select a sort option.

## Personalize Windows

[Change the Desktop Background](#): Click the **Start** button and click the **Settings** icon. Click **Personalization** and then use the options in the Background category to select a new background color or image.

[Pin a Program to the Taskbar](#): With the program running, right-click its icon on the taskbar and select **Pin to taskbar**.

## Personalize Windows

[Customize System Icons](#): Click the **Start** button and click the **Settings** icon. Click **Personalization** and then click **Taskbar** at the left. If needed, scroll down and click **Turn system icons on or off**. Toggle a system icon on or off.

[Move the Taskbar](#): Right-click the taskbar, if **Lock the taskbar** has a check mark next to it, click it to unlock the taskbar. Click and drag the taskbar to the top, bottom, or side of the screen.

[Customize the Lock Screen](#): Click the **Start** button and click the **Settings** icon. Click **Personalization** and then click **Lock screen** at the left. Here, select the desired background, app status icons, and settings.

[Customize Account Settings](#): Click the **Start** button and click the **Settings** icon. Click **Accounts** and then click **Sign-in options** at the left. Modify your account settings here.

## Maintain Your Computer

[Check for Windows Updates](#): Click the **Start** button and click the **Settings** icon. Click **Update & Security** and then click the **Check for updates** button.

[Open the Task Manager](#): Right-click the **Start** button and select **Task Manager**. Or, press **Ctrl + Shift + Esc**. If an open task is no longer responding, select it here and click the **End task** button.

[Improve Battery Life](#): Click the **Battery status** icon in the system tray and click **Battery settings**. Adjust the settings here to improve the battery life of your computer.

[Secure Windows](#): Click the **Security Center** icon in the system tray. A few options for ensuring Windows is secure include:

- **Virus & threat protection** periodically checks your computer for viruses and other malicious files.
- **Account protection** provides security for your account and sign-in.
- **Firewall & network protection** configures network firewalls for private and public networks to keep your computer safe from network attacks.
- **App & browser control** is where you configure warnings for suspicious files, applications, and websites that you download and visit.
- **Device performance & health** keeps track of system, software, and driver updates, while monitoring storage space and battery life.
- **Family options** lets you set up parental controls for this computer, as well as connected devices.
