## The Zoom Meeting Screen

### **Getting Started**

Download the Zoom app: Visit the Zoom website at zoom.us, click the Resources link at the top of the Zoom page, select Download Zoom Client, then click the **Download** button next to the version of the app you want.

Sign In: Open the Start Zoom app, enter your email address and password in the fields, then click Sign In.

### Join a Meeting

Via a Link: Click a Zoom meeting link, give the Zoom app permission to open, wait for the meeting host to admit you, then click Join with Computer Audio.

Using a Meeting Code: Click the Join button. Enter the meeting ID, then click **Join**. Enter the meeting password, then click Join Meeting. Choose whether to join with or without video, wait for the meeting host to admit you, then click Join with Computer Audio.

#### **Meeting Tips**

Prepare Your Space: Connect to a meeting from a quiet space with few distractions. If you're going to be sharing your camera, check your background to make sure that there's nothing that would distract others. If you'll be sharing your screen, don't have unnecessary windows or browser tabs open.

Mute Your Microphone: When you're not talking, mute your own microphone so that any unexpected noises from your end don't disrupt the meeting.

Use Headphones: When you hear an echo during a meeting, it's because someone's microphone is picking up the audio from their speakers and repeating it. Using headphones will prevent this feedback.

Test Your Camera and Microphone Ahead of Time: You can test both your camera and microphone in the Zoom app's Settings screen to make sure that both are working properly before joining a meeting. This prevents you from delaying a meeting by setting up your camera and microphone after it starts.

Wires Over Wireless: Wired connections, for both your computer and audio devices, tend to be more reliable than wireless connections. Connect your computer via ethernet instead of Wi-Fi when possible, and use a headset that connects by USB or audio jack instead of Bluetooth.

## **Meeting Controls**

Mute / Unmute: Toggle your microphone off or on. If you're not talking, keep your microphone muted so that background noise does not disrupt the meeting.

While your microphone is muted, you can press and hold the spacebar to temporarily unmute yourself.

You can also click the menu arrow next to the Mute / Unmute button to change your microphone or speaker or access other audio settings.

Stop / Start Video: Toggle your camera off or on. Depending on the etiquette of the group, you may turn off your camera when not actively participating to reduce distractions.

> You can also click the menu arrow next to the Stop / Start Video button to change the camera used for the meeting, change your virtual background, or change other video settings.

Security: Control several security settings for your meeting. You can lock the meeting, toggle whether to use a waiting room, and control whether participants can mute themselves, toggle their camera, or share their screen.

Manage Participants: Pop out the Participants pane, where you can see who is in the meeting and who is in the waiting room. You can mute specific people, mute everyone, invite new people, and remove people from the meeting.

Chat: Pop out the Zoom Group Chat pane, where you can send chat messages to everyone else in the meeting, or choose a specific person to send a message to. You can also share files here.

Share Screen: Lets you share your entire screen, a single window, or a whiteboard that you and meeting attendees can draw on.

Record: Record a video of the meeting. Depending on the features of your account, you can record a meeting to the cloud or to your computer.

Reactions: Display a reaction emoji on the screen that other meeting participants can see. You can choose from a hand raise emoji, or an applause emoji.
