### The Fundamentals

- A **web address** is also called a Uniform Resource Locator (URL) and it is made up of several parts: **http://** This stands for Hypertext Transfer Protocol, the set of rules for exchanging files on the World Wide Web.  
**Domain name:** The unique name that identifies an Internet site. Domain names have two or more parts separated by dots. For example **www.ask-edi.com** or **www.bcbsks.com**.
- **To Open a Web Page:** Click the **Address Bar** and type the address of the Web page. Or, press <Ctrl> + <O> or <L> and enter the address.
- **To Open a Hyperlink:** Click the hyperlink on the Web page.
- **To Refresh a Web Page:** Click the **Refresh** button on the Standard Buttons Bar, or press <F5>.
- **To Stop Downloading a Page:** Click the **Stop** button on the Standard Buttons Bar, or press <Esc>.
- **To Go Back to a Page:** Click the **Back** button, press <Alt> + <←> or press <Backspace>. Or, click the **Back** button list arrow and select a page from the list.
- **To Go Forward a Page:** Click the **Forward** button or press <Alt> + <→>. Or click the **Forward** button list arrow and select a page from the list.
- **To Print a Web Page:** Select **File** → **Print** from the menu, or press <Ctrl> + <P>.
- **To Print Preview:** Select **File** → **Print Preview** from the menu.
- **To Customize the Standard Buttons Bar:** Select **View** → **Toolbars** → **Customize** from the menu. Or, right-click the Standard Buttons bar and select **Customize** from the contextual menu. Add and remove buttons on the toolbar using the Add and Remove buttons in the dialog box. Click **Close** to confirm the changes.
- **To Use AutoComplete in the Address Bar:** Start typing the URL of the page you want to open. A list of previously typed addresses appears below the Address Bar. Use the down arrows or the mouse to select an address from the list and press <Enter>.
- **To View or Hide Toolbars:** Select **View** → **Toolbars** from the menu. Toolbars with a checkmark next to them are currently displayed in the browser window.

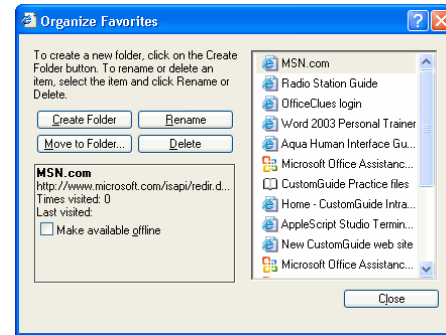

#### Navigation—Address Bar

## Security

- **Information Bar:** The Information bar displays information about security, downloads, blocked pop-up windows, and other security alerts. When activated, it appears at the top of a Web page. When the Information bar appears, click it to view more information about the message or to take action. For example, to allow a pop-up window or install an add-in from the Web site.
- **Pop-up Blocker:** Some Web sites use pop-up windows as a way to advertise, or to download malware on your computer. This feature lets you limit or block most pop-up windows.
- **To Turn Off the Pop-up Blocker:** To open, select **Tools** → **Pop-up Blocker** → **Turn Off Pop-up Blocker** from the menu.

## Search Tips

- The World Wide Web is a vast source of information. Here are a few tips to help find the information you want:
  - Search terms:** To find lots of information on a topic, enter a single search term, such as *Hawaii*. Add terms to narrow results, such as *vacation Hawaii*.
  - Phrases:** To find an exact phrase or name, enclose the phrase in quotations, such as *"the road less traveled"* or *"Abraham Lincoln"*.
  - Using common terms:** Common words or single digits and single letters are sometimes excluded from a search because they can slow down a search. If a common word or character is essential to the results, put a + before the term, such as *Star Wars Episode +1*.
